

Zumar Law Firm Website SEO & Development Recommendations

After reviewing the website, the following improvements are recommended to enhance SEO performance, user experience, website authority, and search visibility.

Homepage Recommendations

1. Hero Section SEO Optimization

The current homepage hero section contains dynamic text that changes the H1 heading and description.

From an SEO perspective, this is not recommended because search engines should always find one consistent primary H1 heading and supporting description.

Required Changes

- Use a single static H1 heading.
- Keep the homepage description fixed.
- Avoid changing important SEO content through sliders or rotating text.
- Highlight different services using separate sections rather than changing the H1.

2. Remove Duplicate Services Section

There is a duplicate services section on the homepage.

Required Changes

- Remove the duplicate section.
- Keep only one properly structured services section.
- Improve page structure and user experience.

3. Islamabad Office Image Replacement

The current Islamabad office image should be replaced with a professional and updated office image.

Required Changes

- Upload an updated Islamabad office photograph.
- Use a high-quality branded image.

4. Image SEO Optimization

All website images should be renamed with SEO-friendly filenames and proper ALT text.

Example File Names

- zumar-law-firm-lahore-office.webp
- zumar-law-firm-islamabad-office.webp
- tax-consultation-services-pakistan.webp
- company-registration-services-pakistan.webp
- trademark-registration-services-pakistan.webp

Example ALT Text

- Zumar Law Firm Islamabad Office
